

REQUEST FOR DRAWING CHANGE APPROVAL

Please add a line completing the connection of the "/CLK" line to the box labeled "LATA" in the left-hand portion of Fig. 24, as shown in red on the attached photocopy of Figs. 24 of the drawings originally filed with this application

Approval of the change to the drawings proposed above in response to this communication will allow the Applicant to file appropriate formal drawings incorporating changes required to correct an inadvertent error by the Applicants draftsman in the preparation of the original drawings for this application (which error was not noticed until recently) upon the allowance of this application. It is respectfully submitted that the change proposed is so clearly an inadvertent error that further detailed support for this request is not required. Applicants, however, will provide appropriate citation to the specification as originally filed in support of this request in the event that the Examiner indicates that such is necessary in the present circumstances.

A decision granting approval to the foregoing proposed drawing change in response to this communication, therefore, is respectfully requested.
